How Hot and Dry Summers May be Foretold.

H. Roc, F. R. A. S , in London Times. When the number representing He do tailor business that Mem's any given year is even and exactly divisible by three, that year time he neber stop cry. Den! is the middle one of three cold and

Plenty too much true dis work I tell. Ebery bit true, All work When the number representing done finish! I not go back dat the year is odd and divisible by three, then that year is the middle Reported of a triad of dry and hot summers.

For example, 1860 is even and divisible by three, and the prevail-How the Quarantine Anthorities ing characteristic of the three years 1859, 1860, 1861, was wet, or wet and cold; and again, 1863 is odd and divisible by three, and every-body remembers 1862, 1863 and Your correspondent at Crystal 1864, as bright, hot and dry sum-Springs, Miss., in his letter of the

30th ult., published to-day, says: Taking now a range of twentyseven years over which my own perhumanity which more become the sonal observations extend, and applying the rules just given, the wet of the nineteenth century," and he and cold triads were 1853-'55, 1859, wrote the truth. As a case in point, -'61, 1865-7, 1871-'73 and 1877,-79, while the hot and dry triads when absent in Texas, learning 1856-'58, 1862-'64, 1863-'71 and that quarantine had been proclaim-1874-'76; and without claiming that ed against our devoted city by her no single year broke loose from this very order of seasons, I fearlessly tened my pace and managed to maintain that all the markedly wet reach Houston in time to catch the or dry summers of the past twentylast regular steamer, which proved seven years fall accurately within to be the "Morgan," under the comsome wet or dry period as given mand of our old friend Capt. Talabove; so that no very wet year falls in what should have been a dry period, nor any very dry in what

hypothetically was a wet season. The year 1881 is odd and divisible by three, and if there is anything in my theory, that year ought to be the middle one in a triad of hot and dry summers. I am looking forward, therefore, with much confidence to a good summer in 1880, followed by two similarly od ones in 1881 and 1882, and for the sake of every interest in the country I earnestly hope my expectation may not be disappointed.

Ayer's Sarsaparilla

Tetter, Salt Rheum, Scald Head, Ringworm, Ulcers, Sores, Rheumatism, Neuralgia, Pain in the Bones, Side and Head, Female Weakness, Sterility, Leucorrhœa, arising from internal ulceration, and Uterine eases, Dropsy, Dyspepsia, Emaciation, General Debility, and for Purifying the

This Sarsaparilla is a combination of vegetable alteratives - Stillingia, Mandrake, Yellow Dock - with the Iodides of Potassium and Iron, and is the most efficacious medicine yet known for

the diseases it is intended to cure. Its ingredients are so skilfully combined, that the full alterative effect of each is assured, and while it is so mild as to be harmless even to children, it is still so effectual as to purge out from the system those impurities and corruptions

which develop into loathsome disease. The reputation it enjoys is derived from its cures, and the confidence which prominent physicians all over the country repose in it, prove their experience of its usefulness. .

Certificates attesting its virtues have accumulated, and are constantly being received, and as many of these cases are publicly known, they furnish convincing evidence of the superiority of this Sarsaparilla over every other alterative medicine. So generally is its superiority to any other medicine known, that we need do no more than to assure the public that the best qualities it has ever possessed are strictly maintained.
